Experience

Infosys

Jul 2026 – Present

Senior Associate Consultant

Mumbai, India

- Working on a telecom client project, contributing to application development and platform engineering using the client's proprietary SLL programming language, a C++-like language.
- Modified Python deployment scripts for executable deployment, platform setup, and application configuration; developed JSON-based test cases using the client's internal testing framework and performed development using the client-provided CPT tool.
- Provided L4 support for application and production tickets, including issue analysis, troubleshooting, and resolution for the telecom platform.

Oct 2024 – Jun 2026

Associate Consultant

Mumbai, India

- Developed Java/Spring Boot backend services for a telecom data-integration platform supporting network inventory, transformation, reconciliation, and downstream delivery.
- Designed and implemented four end-to-end integration adapters and a modular 5G-to-4G integration solution for automated ingestion, transformation, validation, and reconciliation.
- Engineered batch-processing pipelines across REST/SOAP integrations with retry, timeout, error handling, and reusable transformation components.
- Improved processing scalability through parallel execution of up to 5 threads, batch splitting, Kafka consumer groups, and multi-pod deployment on Kubernetes.
- Worked across JSON, CSV, Neo4j, MinIO, Docker, and Kubernetes for data processing, service integration, health checks, monitoring, and automated testing; used GitHub Copilot and an internal client AI/GPT tool for development productivity.

National Stock Exchange of India

July 2021 – Sept 2024

System Analyst

Mumbai, India

- Developed Java/Spring Boot REST APIs for a financial-market surveillance platform supporting report generation, file processing, SFTP-based data exchange, and database operations.
- Built backend services using Spring Data JPA, JDBC, and Hibernate for data upload, validation, maker-checker workflows, and surveillance applications.
- Contributed to the production frontend migration from Angular 7 to Angular 15, including associated UI dependencies.
- Automated production deployment using Linux Bash scripting, reducing estimated manual deployment effort by 70%; supported deployments, server migration, and production incident resolution.

Projects

Maternity Care Website | ReactJS, Google APIs, Material-UI

- Developed and hosted a maternity-care website during a web development internship as part of a three-member team.
- Implemented nearest-doctor discovery using Google APIs, LEAP scoring, video integration, and responsive informational sections.

Posture Detector | Python, Arduino, OpenPose, TensorFlow

- Developed a posture-monitoring system using Python, Arduino Nano, OpenPose, TensorFlow, and Keras to detect incorrect posture and provide biofeedback.

E-Learning Website | Angular, Firebase, JavaScript

- Developed an e-learning web application using Angular 6, Firebase authentication and CRUD operations, HTML, CSS, Bootstrap, and JavaScript.

Technical Skills

Languages: Java, Python, SQL, JavaScript, Linux Shell Scripting

Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST, SOAP

Databases: PostgreSQL, Greenplum, Oracle 19c, Neo4j, Cypher, JDBC

Integration & Messaging: Kafka, SFTP, Data Transformation, Data Reconciliation

Cloud & DevOps: Docker, Kubernetes, MinIO

Frontend: Angular, ReactJS, Bootstrap, Material-UI, HTML, CSS

Tools: Git, Maven, GitHub, Postman, SVN

AI-Assisted Development: GitHub Copilot, ChatGPT, Google Gemini, Claude

Education

Sardar Patel Institute of Technology

Bachelor of Technology in Information Technology

Mumbai, Maharashtra

Achievements & Certifications

- Received the RISE Insta Award from Infosys in July 2026.
- Published an IEEE research paper titled "An IoT Based Rectification of Posture using Biofeedback."
- Completed Linux Bash Shell Scripting certification covering AWK and SED.
- Completed Google's Build with Gemini program.
- Completed NSE NCFM certifications in Financial Markets and Mutual Funds.
- Completed Namaste JavaScript course covering JavaScript fundamentals and core concepts.
